

PRESS RELEASE

SACYR TO PARTICIPATE IN THE REMODELING OF A MAJOR HOSPITAL COMPLEX IN MILAN

- A joint venture led by SIS (49% Sacyr) is to build the new Polyclinic of Milan, located in the center of the city. The budget for this project totals 155 million euros.

Madrid, November 14th, 2019.- A joint venture led by SIS (Fininc, 51%; Sacyr, 49%) has been awarded the contract for the remodeling of a large health complex in the center of Milan (Italy), the “Policlinico Mangiagalli e Regina Elena” Hospital. The budget for the project amounts to **155.4 million euros** and the duration is for **three years**.

Sacyr Engineering and Infrastructures, Sacyr’s construction division, and its partners **will construct a central building** consisting of 700 hospital beds, 21 operating rooms and 45 consultation rooms. The surface area of this new installation will total 65,000 m².

The joint venture is owned by SIS (60.8%); Arco (21.9%); Innova (9.4%) and Palaser (7.9%).

New underground connections

This project envisages the **integration of the scientific and health buildings of the Polyclinic** by means of a new system of underground connections to enable the staff to circulate and equipment and material to be transported. In addition, new protected routes will be created on the surface, together with an underground parking lot.

In total, the project covers a surface area of 92,000 square meters for the new building, the adjoining retail area and the parking lot.

This project strengthens Sacyr’s presence in Italy, where in addition, through the SIS consortium, it is currently constructing its largest concessional project: the Pedemontana-Veneto highway.
